Non-Profit Web Toolkit

Like any toolkit or tool belt, each user has their own tools and their own favorites.

Some of the tools you might want for your toolkit include:

- **Viral Card Campaign (in Honor of Donations)** – turn those simple donations into viral giving. Each donor can honor someone with the donation or even invite others to donate.
- **Sponsorship Campaign** – Whether your big event is a bike ride, a clay shoot or some other type of competition, our sponsorship app makes it easy for each participant to reach out to more donors.
- **Event Management** – We customize your event tool to your specific needs. Have a mix of free and paid events? We can help. Need some events to have RSVP and others not, we can handle that. Think you have event needs we can't handle? Call us. We can handle it.
- **Member Management** – need to track members? Need to have members join or renew online? Need to see reports on what members you have and at what level? We've got you covered. Our custom developed member management tool will be tailored to your specific needs and be scalable so it can change and grow with you.
- **Donor Management** – Whether you have a preferred software that we need to integrate with or want a custom donor management tool, we have the customized solution to meet your needs.
- **Mapping Tool** – we do lots of custom work. One tourism-based client had a glossy brochure. We asked for zip / postal codes of visitors in order for them to download the brochure. All codes are then plotted on a map on the backend so the client could see where the downloads were coming from.
- **Online reservations** – Whether it be individual rooms at your facility or even parks you manage, we have a tool that lets folks reserve and pay for the reservation online
- **Member Directory** – let your members build their profiles and determine what part of their profile should be available online.
- **Schedule a Tour** – whether you are looking to get new students, new donors or just raise awareness, our tour scheduler app can engage your visitors and help you capture them as customers or donors.
- **Build a Trip** – Need folks to stop by more than one sponsor or member? Our trip builder app is a great way for folks to add all the places they want to visit and then get turn by turn driving instructions to visit each one
- **API Integration** – Do you already have a donor management tool such as etapestry or customer relationship management tool like Sales Force that you're using? Our team can integrate the usage so you get better and more data in your existing system.
- **Integrated Newsletter Tool** – Turn your posts or articles into items that automatically flow into your newsletter, saving you time and keeping you from having to duplicate efforts.
